

Vaccines for Adults at Risk

Available Vaccine List

Providers enrolled in the Vaccines for Adults at Risk (VFAAR) program can order a subset of available vaccines based on the vaccination needs of the population of eligible patients (uninsured adults 19 years of age and older) they serve. Email our team at DPHProviderHelp@phila.gov to learn more about the VFAAR program or to make updates to the vaccines that your site offers through VFAAR.
