

Mpox Vaccine Dose Tracker

Jynneos

Storage Guidance

- **The vaccine will come refrigerated. Do not refreeze.**
- Store in a refrigerator at 2°C - 7°C (36°F - 46°F) at all times.
- Do not store at room temperature, even after puncture.
- Discard after 8 hours after puncture.

Tracking Doses Given

- Circle any doses provided to patients in the appropriate **# Doses Given** section. **# ID Doses Given** for intradermal administration and **# SubQ Doses Given** for subcutaneous administration. Write the patients' initials and time given next to the circled number.
- Mark off any wasted doses in the **# Doses Given** section with an "X." **Only report wastage if a full vial has been wasted.**
- Scan the QR code to download our [Mpox Vaccine Wastage Guide](#).
