

Protect your family from **measles**

Measles is **still common** in many parts of the world. Unvaccinated travelers who get measles in other countries continue to bring the disease into the United States.

MMR vaccination is the **best protection** against measles.

1 dose:

93-95%
effective

2 doses:

97%
effective

Planning a trip abroad with your child?

6–11 months old need:

1 dose

12 months and older need:

2 doses

Talk to your doctor before leaving to make sure your children are protected.
